B = Boy **G = Girl**

Columns 1-12 = lunar conception month

How to read this chart

1. Find the mother's lunar age at conception with our lunar-age calculator.
2. Match the conception date to its lunar month on page 2.
3. Read where that age row and month column meet.

For entertainment only. This folklore chart is not scientifically reliable and is no better than chance. It cannot determine a baby's sex. Different circulating charts can disagree.

2028 DATE REFERENCE

Dec 16 - Dec 31	2028	**11**

Only dates within 2028 are listed. The first and last lunar months continue outside this calendar year. Includes leap lunar month 5.

Before you choose a row

Lunar age: conception lunar year minus birth lunar year plus one. It changes at Lunar New Year, so simply adding one to your current age may be wrong.
Due dates: our calculator estimates conception as due date minus 266 days. That is an estimate; dates near the start or end of a lunar month can change the chart result.
Leap lunar months: our calculator uses the same numbered month. Other charts may use another rule.
